GOAL

The goal of LIVESTRONG Fertility is to increase access to fertility preservation services and treatments for qualified men who are diagnosed with cancer during their reproductive years.

We are proud to offer assistance to qualified male applicants by providing access to discounted sperm banking services through the generous support of participating sperm banking facilities.

OVERVIEW

LIVESTRONG Fertility does not grant direct financial contributions to individuals. Instead, the LIVESTRONG Foundation has partnered with key organizations to increase access to procedures and treatments intended to preserve the possibility of fertility for qualified cancer patients whose medical treatments present the risk of infertility and who meet the criteria set forth below.

For a list of participating facilities, please call 855.220.7777.

WHAT IS INCLUDED?

LIVESTRONG Fertility helps reduce the cost of sperm banking services which include but may not be limited to:

- *One on-site collection of a sperm specimen at a participating location or one off-site collection of a sperm specimen through a sperm banking by mail service*
- *Analysis, processing and freezing of one sperm specimen*

WHAT IS NOT INCLUDED?

While we understand the importance of other fertility preservation and parenthood options, this program only covers sperm cryopreservation. The reduced cost offered by the reproductive center does not include many of the additional costs of preparing for or going through treatment.

THESE ADDITIONAL COSTS COULD INCLUDE, BUT ARE NOT LIMITED TO:

- » *Laboratory work performed on your behalf*
- » *Infectious disease testing*
- » *Doctors' fees*
- » *Long-term storage**
- » *Implantation procedures*
- » *Travel to fertility centers*

**Discounts on long-term storage may be available.*

The participant or his insurance company will have to bear the costs of services provided by entities or individuals not affiliated with LIVESTRONG Fertility, including, but not limited to, the costs associated with the related services noted above. It is important to know what those costs are and to plan accordingly.

Prior to banking sperm, all program participants are required to have infectious disease blood tests. Patients must contact the participating sperm bank to find out which blood tests are required and when the tests must be conducted and sent to the facility. The participant's oncologist may conduct the tests or the tests can be performed on-site at the sperm bank at an additional cost. If the test results are not received, the participant may be charged additional quarantine fees.

If a physician determines that treatments or medications other than the services provided by the sperm bank are necessary, the participant will be responsible for the cost of such treatments and medications.

LIVESTRONG Fertility does not cover the cost of oncology services or any associated expenses incurred during cancer treatments. Please keep in mind that the Foundation is not a medical provider; all program participants acknowledge and agree that the Foundation shall not be liable for any aspect of their current and future treatment. All cancer patients should discuss the risks, side effects, time requirements and other aspects of all treatment options with their physicians before selecting the most appropriate course of care.
